ISPARTA UYGULAMALI BİLİMLER ÜNİVERSİTESİ -TEKNOLOJİ FAKÜLTESİ BİLGİSAYAR MÜHENDİSLİĞİ BÖLÜMÜ 2021-2022 GÜZ DÖNEMİ BLG-101 ALGORİTMA VE PROGRAMLAMAYA GİRİŞ DERSİ ÖDEV RAPORU

Ad Soyad: İlkay Onay Numara: 2112721017

#### Ödev 1)

1. 3X3 boyutlarındaki klavyeden elemanları girilen A ve B matrisleri arasında C=A+B, C=AxB ve detA hesaplayıp sonuçları anlaşılır bir görsellikte ekrana yazan programı yazın. (bu klasik ve önemli problemin kaynaklarda çok sayıda çözümü mevcuttur, kendi özgün çözümünüzü oluşturmanız sizin için önemlidir!)

```
Ödev 1 Kodları)
#include <iostream>
#include <locale.h>

#### Ödev 2)

- 2. Bir işletmenin son 5 yıllık her aya ait ciro miktarları (100-5000 arasında) veri olarak bulunmaktadır. Bu veriler üzerinde aşağıdaki hesaplamaları yaptıran programı yazın;
  - Bu verileri "ciro" adında uygun bir dizi yapısına giriniz (veya 100-5000 arasında rastgele üretiniz)
  - Yıllık ortalama ciroları ayrı ayrı hesaplayarak, ayrı bir "ortciro" adında uygun bir dizi yapısına atayınız
  - Klavyeden girilen yılın (yıl sırasına göre 1.yıl, 2.yıl vs.) ortalamasından yüksek olan ayların ay sırası ve cirolarını ekrana yazan
  - Klavyeden girilen yılın (yıl sırasına göre 1.yıl, 2.yıl vs.) her çeyreğinin (1-2-3.aylar ilk çeyrek vs.) ortalamasını hesaplayıp ekrana yazan

```

    cout << endl;
    system("pause");
    return 0;
}</pre>
```

## Ödev 7 test/deneme ekran görüntüleri)

## Ödev 8)

- 4. Bir veri setindeki verilerin;
- Aritmetik ortalamasını bulup ekrana yazan
- En küçük ve en büyük veriyi bulup ekrana yazan
- Verilerin frekanslarını (hangi veriden kaç adet var, örneğin 8'den 3 adet, 21'den 6 adet vs.) ekrana yazan
- Tek ve çift olanlarını ayrı ayrı dizilere atayan (veri setini bölen)
- Ortalamadan küçük olanları ve diğerlerini ayrı ayrı dizilere atayan (veri setini bölen) programı yazınız. (önceden ürettiğiniz veriler üzerinde uygulayın)
